

◆ Ordering Code

BVP — **40**

BVP: BVP series
Piston Impact Vibrator

Size:
30 40 60

◆ Features

Features:

- Large power, a small amount of lubrication, quiet.
- High strength aluminum alloy hardening treatment, light weight.
- Low frequency vibration, the best effect on bridge damage
- Adjust the amplitude and frequency of vibration

Application:

- To solve the tank material attachment, auxiliary material flowing
- Can be used for vibration screening and horizontal conveying equipment

◆ Structure

High strength aluminum shell, corrosion resistant, with special grease, no spring and other vulnerable parts, can be installed at any position and direction, the piston is driven by compressed air to generate regular vibration , good effect on bridging blockage , adapt to different applications

◆ Dimension

Pneumatic Vibrator, BVP series Piston Impact Vibrator

MODEL	A	B	C	D	H	Inlet	Exhaust	Base
